Agricultural Meteorological Scheme.

Bibliography of Literature on Agricultural Meteorology.

Section 1. Subject Index.

2

MINISTRY OF AGRICULTURE AND FISHERIES

AND

DEPARTMENT OF AGRICULTURE FOR SCOTLAND.

AGRICULTURAL METEOROLOGICAL SCHEME.

BIBLIOGRAPHY OF LITERATURE ON AGRICULTURAL METEOROLOGY.

This bibliography contains, with a few exceptions, the references to literature dealing with agricultural meteorology and allied subjects, which have been published in the Ministry's Crop Weather Reports, from the inception of the Agricultural Meteorological Scheme in 1924 to the end of September, 1930. Summaries and extracts, where available, are included in the volume and are contained in a separate section. This arrangement is considered better than one having each reference followed by its relative summary or extract, because the references are brought closer together and their perusal is thereby much simplified. Furthermore, it is possible, by the employment of reference numbers, to turn directly from reference to summary whether the reference be found in the subject, or author's index.

PLANTS.

Temperature as a Growth Factor (Trans. title). H. Foss. 595
Nord. Jordbr Forskn. 7. (1925) 17.
Abst. in Z. Pflernähr. Düng.u.Boden. 7. (1928) Pt.8.

Assimilation at Different Temperatures (Trans.title). R.Harder
Jahrb.wiss.Bot.64. (1924) No.1 pp. 169-200.
Abst. in Expt. Sta. Rec. Wash. 54. (1926) No. 8. p. 726.

Temperature Summations with reference to Plant Life. G.A.Pearson.
Mon. Weath. Rev. Wash. 52 (1924) No. 4. pp.218-120.

The Annual Temperature Curve in the Temperate Zone in relation to the recurrent Plant Phenomena (Trans.title) W. Koppen.
Met. Z. 43. 1926. pp. 161 - 72.

The Annual course of Air Temperature and the Vegetation Period (Trans. title). E. Rubenstein.
Met. Z. 44 (1927) pp. 13 - 8.

Investigation on the after-effect of Low Temperature on the length of the Vegetation Period (Trans. title).N.A. Maximow and M.A. Krotkina. 596
Bull.Appl.Bot.Gen.Pl.Breed. 23. No.2. English Summary pp.477-8.

Influence of Temperature and Precipitation on Vegetation (Trans.title). W. Grosse.
Met. Z. 43 (1926) No.9. pp. 352-5.

Long period variations in Air Temperature and their Influence on Agricultural Vegetation (Trans.title). J. Ruzicka.
Mitt. Techecheslow. Akad. Landw. 3 (1927). pp.1061-7.

The response of certain Photoperiodic Plants to differing Temperature and Humidity Conditions. B.E. Gilbert. 86
Ann.Bot. Oxford. 40 (1926). No. 158. pp.315-20.

On the correlation between Temperature and the Flowering Season (Trans.title). L. Eble.
Met. Paris (n.s.) 2nd Sep. 1926. pp. 406-11.

The influence of Temperature and Light on the Date of Flowering (Trans.title). A.I.Molozev.
Bull.Appl.Bot.Gen.Pl.Breed.22.1929.pp.277-372. English summary.

The Effect of Temperature on Flowers. F.M. Andrews. 580
Pl. Physiol.4 (1929). No. 2. pp. 281-4.
Abst. in Expt.Sta.Rec. Wash. 61. No.9. p. 837.

Pollen-tube growth at various temperatures. J.T. Buchholtz and A.F. Blakeslee. 505
Amer. J. Bot. 14. No. 7. pp. 358-69.

A contribution/

A contribution to the study of Frost damage (Trans.title).
D. Scaramuzzi.
Ital. Agric. 66 (1929). pp. 261-77.

Observations on Frost damage in the Province in Ravenna (Trans.title). M.Marani, F.Dotti and L. Cirio.
Ital. Agric. 66 (1929). pp. 144-56.

The Freezing Temperatures of some Fruits, Vegetables and Cut Flowers.
Bull.U.S.Dept. Agric. No. 1133.

Frost and Plants (Trans.title). A. Rolet.
Nature, Paris. 58.1. pp. 177-9.

The Influence of Low Temperatures on Plants (Trans.title) 225
T.M. Zacharowa.
Jahrb,wiss.Bot. 65 (1925). No.1. pp. 61-87.
Abst. in Expt.Sta.Rec.Wash.57. No.5. Oct.1927.p.419.(Jan.1928)

Low Temperature and the Life of Plants (Trans.title).
S. Mercuri.
Met.prat,Montecassino. 9 (1928) No. 1. pp. 17-20.

The prevention of winter killing and Frost damage 540
(Trans.title) M. Umberg.
Landw.Ztg. Bolzano. 44. 1st Nov. 1929.

Internal Factors of Frost and Drought Resistance of Plants. 539
N.A. Maximow.
Bull.Appl.Bot.Gen.Pl.Breed. 22. 1929. pp.3-41.

Studies on the killing of Plants by Cold and their Resistance 433
to Cold (Trans.title). A. Akerman and J.Lindberg.
Lund.1927. Abst. in Ann.Sci.Agron. 46 (1929) No.2. pp.232-3.
Abst. and discussion in C.R. Acad. Agric. Fr. 1st May 1929.
pp. 555-79.

The Effect of Cold Temperatures on the Growth of Vegetables.
J.E. Knott.
J. Amer. Soc. Agron. 17. (1925) No.1. pp. 54-7.

The Influence of Light and Heat on the formation of Vitamin 217
A in Plant Tissues. K.H. Coward.
J. Biol. Chem. 72 (1927) No. 2. pp. 781-99,
Abst. in Expt.Sta.Rec. Wash. 57. No. 3. p.294 (Oct. 1927)

The influence of Temperature on the unequal absorption of the salt ions by Plants, A.K.H. Petrie.
Aust.J.Exp.Biol.Med.Sci. 4. p.169.

Figures indicating the effect of Temperature on Yield (Trans title). I.A.L.
Ugeskr. Landm. 74. No. 8. p. 117.

On the Dependence of the Harvest upon the Temperature in the foregoing Winter and May (Trans.title). J. Keranen.
Mitt. Met. Zent.Anst.Finn.Staates. 15. 1925.

The Influence of Chilling, above the Freezing Point, on 327
certain Crop Plants. J.F.F. Sellschop and S.C. Salmon.
J. Agric.Res. 37. (1928). No. 6. pp. 315-38.

The Dependence/

The Dependence of the Yields of Crops on Rainfall and Temperature (Trans.title). E. Less.
Landw. Jahrb. 64. (1926) 2. pp. 241-96,

The Relations of Soil and Air Temperatures in their influence on Crop Returns (Trans.title). H. Kaserer. 260
Fortschr. Landw. 2. (1927). No. 7. pp. 205-12.
Abst. in Int. Rev.Sci.Prac.Agric. 18. n.s. No.5. (1927) pp. 258-9.

The Effects of Temperature and Humidity on the Changes in Weight of Crops in Storage. H.J. Page and G.V. Jacks.
Rep.Agric.Met.Conf.Lond. 1927. pp.15-8.

The Effect of the Frosts of December, 1927, om Cereals in France (Trans.title). J. Sanson. 300
Grande Rev. Agric. August 1928. pp.1061-5.

The Effect of the Frosts of the Winter of 1928-29 on the Crops at the Agricultural Research Centre at Versailles (Trans.title). H. Geslin.
Ann.Sci.Agron. 46 (1929). No. 4. pp. 475-81.

The injuries caused to crops by the hard Frosts of Mid December, 1927. (Trans.title)
Met. Paris 4 (1928). pp. 70-1.

Changes produced by late frosts in culms of cereals (Trans. title) L. Petri.
Boll. R. Staz. Patol. Veg. 7. 2. pp. 194-202.

The Injury to Winter Cereal Crops in relation to the Time of Sowing in the Nizhnii-Novgorod Government in 1923-26. (Trans.title) A.A. Pisnyachevskii. 275
Def. Pl. 4 (1927) No. 4-5. pp.636-655.
Abst. in Rev.Appl.Ent. 16A (1928) Pt 7. pp. 366-7.

The resistance of Grain to Low Temperatures (Trans.title) F. Crescini and D. Tettamanzi.
Ital. Agric. 66. (1929) pp. 546-52.

Investigations into Frost resistance of winter crops by means of direct freezing and of indirect methods. 532
II Tumanov and I. Borodin.
Bull.Appl.Bot.Gen.Pl.Breed. 22 (1929) pp. 395-440.

On a Relation existing between the three Climatic Factors - Rain, Temperature and Light and the Yield of Wheat at Rennes (Trans.title). H. Geslin. 533
C.R. Acad.Agric.Fr. 16. (1930). No. 14. pp. 513-20.

Influence of Plant Cover (Winter Wheat) on the Temperature of the surface Soil and the Temperature and Moisture of the Air (Trans.title). A. Kameneff. 609
Mem.Inst.Agron.Leningrad. 5 (1929) No.5. pp. 43-75.
German abstract on pp.74-5.
Abst. in Expt. Sta. Rec. Wash. 62. No. 4. p.313.

Temperature effects in the metabolism of Wheat. 116
W.E. Tottingham.
Plant. Physiol. 1. pp. 307-36.

Relation/

Relation of Leaf Acidity to Vigour in Wheat grown at different Temperatures. A.M. Hurd-Karrer. 462
J.Agric.Res. 39. (1929) No. 5. pp. 341-50.

Relation of Soil Moisture Content to Resistance of Wheat Seedlings to low Temperatures. K.H. Klages. 280
J.Amer.Soc.Agron. 18 (1926). No.3. pp. 184-93.
Abst. in Expt.Sta.Rec.Wash. 58. No.9. p.822.

Methods of study of the resistance of Wheat to Cold (Trans. title). F. Moreau and A. Dusseau.
J.Agric.prat. Paris 50. No. 40. p. 276-80.

The Resistance of Certain Varieties of Winter Wheat to Artificially produced Low Temperatures. D.D. Hill and S.C. Salmon.
J. Agric. Res. 35. 1927. No. 10. pp.933-7.

Study of the resistance of Wheat to Cold (Trans.title) F. Moreau and A. Dusseau.
Rev.Bot. appl.No. 83. 1928.

The Effect of December Frosts on Wheat. (Trans.title) 301
M. Blanchard.
Grande Rev. agric. Aug. 1928. pp. 1093-4.

Effects of the Autumn Frosts of 1927 on Wheat in France (Trans.title). Anon.
Ann.Epiphyties 14 (1928). No. 6. pp.438-41.

Studies on the resistance to cold of Wheats manured with Nitrates (Trans.title). E. Mancini.
Ital. Agric. Feb. 1929.

Seasonal Changes in the Composition of Winter Wheat Plants in relation to Forest Resistance. R. Newton and W.R. Brown. 113
J.Agric.Sci. 16 (1926). Pt.4. pp. 522-38.

A comparison of some properties of Normal and Frosted Wheats 553
A.H. Johnson and W.C. Whitcomb.
Bull.Montana Agric. Expt. Sta. No. 204. 1927.
Abst. in Expt.Sta.Rec. Wash. 60. No.3. p.228.

Moisture Content of Corn (Maize) in relation to Relative Humidity and Temperature of the Atmosphere. H.W.Alberts. 121
J.Amer.Soc.Agron. 18. (1926) No.11. pp.1029-34.
Abst. in Expt.Sta.Rec. Wash.56. No.9. pp. 826-7.

The Effect of High Temperatures on the Germination and Subsequent Growth of Maize. R. Keinholz. 66
Philipp.J.Sci. 25 (1924) No.3. pp. 311-47.
Abst. in Expt.Sta.Rec. Wash. 53. No.7. p.623.

The mean Temperature of Maize leaves exposed to the sun (Trans.title). P. Mazé.
C.R.Acad.Sci. Paris 188 (1929). pp. 567-9.

On the Temperature of the chloroleucites in Maize plants exposed to the Sun (Trans.title). P. Mazé. 431
C.R.Acad.Sci. Paris. 188. No.4. pp.337-141,
Abst. in Ann.Sci.Agron. 46 (1929). No.2. p.229.

Studies of Cold Resistance and Susceptibility in Corn (Maize) J.R. Holbert and W.L. Burlison. 399
Abst. in Phytopathology 19 (1929). No.1. pp.105-6.

The Influence/

The Influence of Fertilisers in Protecting Maize against Freezing. O.C. Magistad and E. Truog.
J.Amer.Soc.Agron. 17. (1925) No.9. pp.517-26.

Discolouration and Growth Checks in Barley and other varieties of cereals: is this injury caused by cold? (Trans.title) E. Hiltner.
Prakt.Bl.Pflanzenb. 4. No. 49. 1926.

Frozen Rye (Trans.title). C.Matha.
Landw.Ztg.Bolzano (1928). No.16. p. 194.

Geographical Distribution of the Flax growing districts in U.S.S.R., according to quality of fibre, with reference to Temperature and Rainfall during the growing period (Trans.title) A.D.Lebedev and A.F.Evert. (English summary) 474
Bull.Appl.Bot.Gen. and Plant Breed. 18. No.1. pp.371-96.
Abst. in Biol.Abst. 3 (1929). No. 4-6. p. 852.

Influence of Temperature and Rainfall on Trifolium pratense (Trans.title). G.Viggiani.
Nuovi: Ann.Minist.Agric.Roma. 6. (1926). No.3-4. pp.565-91.

Differences in resistance to Low Temperatures shown by Clover varieties. G. Steinbauer. 199
Plant. Physiol. 1. (1926). No.3. pp. 281-6.
Abst. in Expt.Sta.Rec. Wash. 56. No.8. p.735.

Alfalfa Root Injuries resulting from Freezing. J.L.Weimer. 511
J.Agric.Res. 40. (1930) No. 2. pp. 121-43.

Some factors involved in the Winter killing of Alfalfa. 461
J.L.Weimer.
J.Agric.Res. 39. (1929). No.4. pp. 271-82.

The Fruit-Frost Work of the Weather Bureau in the Upper San Joaquin Valley. C.C. Allen.
Mon.Weath.Rev.Wash.57. (1929). No.10. pp.424-5.

Winter Injury of Fruit Trees.
V.P.Hedrich. Amer.Fruit Gr. 45. (1925). No.3. p.39.

The Spring Frost of 1929 and the Fruit Trees (Trans.title) A. Manaresi.
Ital.Agric. 66 (1929) pp. 605-8.

Protecting Orchards from Frost. J.B. Kincer.
Bull.Amer.Met.Soc. 6. 1925. pp.118-22.

Development and present Status of Frost Fighting Devices. 42
F.D.Young.
Mon.Weath.Rev. Wash. 53 (1925). No.8. pp. 349-51.

The Relation between Cover Crops and Orchard Temperatures. 48
F.D. Young.
Mon.Weath.Rev. Wash. 53 (1925). No.9. pp.387-91.

Defence against Night Frosts (Trans.title) - Kerz.
Geisenheim.Mitt.Obst-u.Gtb. 43. (1928). No.10. p.163.

Protection of Orchards against Frosts. E. Kidson.
N.Z.J.Sci.Tech. 9. No.4. pp.213-25.

The Protection/

The protection of Young Citrus Trees from Frost. E.S. West. 597
J.Coun.Sci.Indust.Res. 3. (1930). No.1. pp.44-8.

Enquiry into the losses caused by Frost to Fruit Trees in Czechoslovakia (Trans.title). K.Kamenicky.
Bull.Czechoslov.Acad.Agric. 5. Nov.1929. pp.880-4.
English summary on pp.963-4.

Effect of Light, Carbon Dioxide and Temperature on flower and fruit production J.M. Arthur and J.D. Guthrie. 472
Mem.Hort.Soc. 3. (1927) pp.73-4.
Abst. in Expt.Sta.Rec. Wash. 60. No.9. pp.806-7.

Temperature Conditions in Small Cold Storage Chambers containing Fruit. A.J.M.Smith.
Sp.Rep.Food Invest.Bd.Lond. No.27. 1926.

Critical Spring Temperatures for Apples in the Yakima Valley, Washington. E.S. Ellison and W.L.Close 164 ~~163~~
Mon.Weath.Rev. Wash. 55 (1927). No.1. pp.11-8.

The Relation of Spring Temperatures to Apple Yields. 226
W.A. Mattice.
Mon.Weath.Rev. Wash. 55. (1927). No.10. pp.456-9.

Some High Temperature" Effects in Apples. C. Brooks 87
and D.F. Fisher.
J.Agric.Res. 32. (1926). No.1. pp.1-16.

Mean Summer or "Optimum" Temperatures in relation to 276
Chemical Composition in the Apple. J.S. Caldwell.
J.Agric.Res. 36. (1928) No.4. pp.367-89.

The Effect of Freezing on the Respiration of the Apple. 39
D.B. Carrick.
Mem.Cornell.Agric.Expt.Sta. No.110. (1928).
Abst. in Expt.Sta.Rec. Wash.59. No.3. p.215.

The Effect of Freezing on the Catalese Activity of Apple 644
Fruits. D.B.Carrick.
Mem.Cornell Agric.Expt.Sta. No.122. (1929).
Abst. in Expt.Sta.Rec. Wash.61. No.5. p.426.

Biology and Refrigeration. II.Refrigeration and Fruit.
F. Kidd.
J.R.Soc.Arts. 77. Feb. 1929. pp.288-306.

Temperature Conditions in Refrigerated Holds carrying Apples. A.J.M.Smith.
Sp.Rep.Food Invest.Bd. Lond. 27. 1926.

Changes in the Chemical Composition of Pears stored at different Temperatures. A.M. Emmett.
Ann Bot. Oxford. 43. No.170. pp. 269-308.

Concerning the damage caused by winter cold to the buds of Cherry trees (Trans.title) A. Manaresi.
Ital.agric. 66 (1929). No.7. pp. 527-9.

Effect of Low Temperature on duration of life of Cherry blossoms (Trans.title) . M.Miyoshi. 512
Proc.Imp.Acad.Tokyo. 4,9, pp. 541-2.
Abst. in Biol.Abst. 3? (1929). No.9-11. p.1670.

Frost/

Frost damage to Vines (Trans.title). K. Müller.
Weinb.u.Kellerw. 1929. No.4. p. 25.

Frost protection measures in Viticulture (Trans.title)
J. Lösching.
Landw. 1928. No.12. p.499.

The Frost protection measures taken in Viticulture, 1929
(Trans.title). Anon.
Landw. 1929. No.1. p.6.

Frost and Frost protection in Viticulture (Trans.title).
Kessler. O.W.
Wein.u.Rebe. 10.1928.

Winter Frost damage in the Vineyard (Trans.title) Anon.
Landw. 1928. No.1.

The Spring and Winter Frost damage in the Zurich Vineyards
in the years 1926 - 1929 (Trans.title). A. Schellenberg.
Landw. Jahrb.Schweiz. (1930) pp. 83-124.

The resistance of Soft Fruit to Frost and Drought (Trans.
title). Goe.
Obst-u.Gem. 1929. p.9.

The Minimum Temperature for Growth of the Date Palm. 52
S.C. Mason.
J.Agric. Res. 31. (1925) No.5. pp. 401-14.

Partial Thermostasy of the Growth Centre of the Date Palm. 53
S.C. Mason.
J.Agric.Res.31. (1925) No.5. pp.415-53.

A Forecast of the Annual Almond Crop based on the Air
Temperature and Precipitation of the Three Months January
to March. F. Eredia.
Rend.Acc.Lincei. 1925.
Abstract in Met. prat. Montecassino (1925) pp. 193-6.

Air Temperature and Soil Temperature requirements of the 498
Tomato under Glasshouse conditions. W. Corbett and
W.F. Bewley.
Rep.Exp.Res.Sta.Cheshunt 1928. pp. 115-21.

The Protection of Strawberries from Frost through Artificial
Heating A.W. Cook.
Mon.Weath.Rev.Wash.55 (1927) No.8. pp. 354-7.

The Influence of Temperature upon the Growth and Yield of 240
Garden Peas. V.R. Boswell.
Proc.Amer.Soc.Hort.Sci. 23 (1926). pp.162-8.
Abst. in Expt.Sta.Rec. Wash. 58. No.3. p.231.

Temperature influence upon chemical composition and quality 554
of Peas (Pisum sativum, L.). V.R. Boswell.
Proc.Amer.Soc.Hort.Sci.25 (1928). pp.21-6.
Abst. in Expt.Sta.Rec. Wash. 61. No.7. p.641.

Comparative/

Air Temperature and Tree Limits (Trans.title).W.R.Eckardt.
Petermanns Mitt. 70 (1924) 5-6. pp. 126-7.

Summer Temperature and Diameter Growth of Picea excelsa (Trans.title). E. Eide. 506
Medd.Norske Skogsförsöksv. 2.7. pp.87-104. German summary.
Abst. in Biol.Abst. 3. (1929). No.7-8. p.1440.

Effect of excessively high Temperatures on coniferous reproduction. F.S.Baker. 600
J.For. 27. (1929). No.8. pp.949-75.
Abst. in Expt.Sta.Rec. Wash.62. No.6. p.531.

Relative Resistance of Tree Seedlings to Excessive Heat. 59
C.G.Bates and J. Roeser Jr.
Bull.U.S.Dept.Agric. No.1263. (1924) pp.1-16.
Abst. in Bot.Abst.15. (1926). No.1. p.78.

Length of exposure to low Temperature as a factor in the hardening process in Tree seedlings. R.B.Harvey. 601
J.For. 28. (1930). No.1. pp. 50-3.
Abst. in Expt.Sta.Rec. Wash. 62. No.7. p.641.

Methods of determining Duration of Temperature above a given degree, and their application to the Limits of Distribution of Common Beech and Red Oak(Trans.title). W. Koppen. 221
Bot.Jahrb. 60. (1926) 5. pp. 553-64.
Abst. in Biol.Abst. 1. (1927) No.5. p.596.

The Cold Weather of 13th February 1929. Its effect on the Trees and Shrubs in the neighbourhood of Marseilles. (Trans. title). L. Laurent.
Bull.Comm.Met.Bouches-du-Rhone 48 (1929). pp.97-110.

PLANT DISEASES.

The Relation of Temperature to the Development of Disease in Plants. J.G. Dickson and J.R.Holbert. 302
Amer.Nat. 62. (1928) No.681. pp.311-33.

Temperature and Moisture relations of Femes roseus and Trametes subrosea. W.H. Snell, W.G.Hutchinson and K.H.N.Newton. 415
Mycologia. 5. pp.276-91.
Abst. in Rev.20.Appl.Mycol. 8.(1929). Pt.3. p.147.

Importance of Temperature in control of Snapdragon Rust. 603
T.H.White.
Flor.Exch. 69. No.7. p.612.
Abst. in Biol.Abst. 4 (1930) No.2. p.346.

The Relation of Temperature during the Growing Season to the occurrence of Stem Rust Epidemics in the Spring Wheat area of the U.S.A. E.C. Stakman and E.B. Lambert. 253
Phytopathology 18 (1928). No.4. pp.369-74.

Relation of Growth of Helminthosporium Sacchari to Temperature. F.F.Halma and H.S. Fawcett. 20
Phytopathology 15. (1925) No.8. pp.463-9.

The influence of Temperature on the frequency of mutation in Helminthosporium sativum. J.J. Christensen.
Phytopathology 19. p.155.

Temperature/

Temperature Relations to the growth of graminicolous species of Helminthosporium: 1. Effect of Temperature on the vegetative and reproductive growth of Helminthosporium turcicum Passer and Helminthosporium maydis Nisikado et Miyake (Trans.title). Y. Nisikado. 475
Ber.Ohara Inst. 3. No.3. pp.349-77.
Abst. in Biol. Abst. 3 (1929). No.4-6. - p.451.

Studies on the relation of Temperature to the Growth, Parasitism, Thermal Death Points and Control of Mycogone Perniciosa. E.B. Lambert. 602
Phytopathology. 20. No.1. pp.75-83.
Abst. in Rev.Appl.Mycol. 9 (1930) Pt 7.

The Influence of Temperature upon the Metabolism and Expression of Disease Resistance in Selfed Lines of Corn (Maize). J.G. Dickson and J.R. Holbert.
J.Amer.Soc.Agron. 18 (1926). No.4. pp. 314-22.

The Relation of Temperature and Soil Moisture to Diseased and Disease Free Corn (Maize). T. Vibar. 120
Philipp. J.Sci. 31 (1926) No.2. pp.169-216.

The Relation of Atmospheric Temperature and Humidity to Tomato Leaf Mould. T. Small. 499
Ann. Appl. Biol. 17 (1930). No.1. pp. 71-80.

Relation of Temperature to Citrus Fruit Decay (Soft Rot) H.S. Fawcett and W.R. Barger. 232
J.Agric.Res. 35 (1927) No.10. pp. 925-31.

A study of Decay in Citrus Fruits produced by Inoculations with known Mixtures of Fungi at Different Constant Temperatures. G. Savastano and H.S. Fawcett. 583
J.Agric.Res. 39 (1929) No.3. pp.163-98.
Abst. in Expt.Sta.Rec.Wash.61. No.8. p.747.

The effect of Temperature on the development of Peach Rots. C. Brooks.
Yearb.Agric.U.S.Dept.Agric.1928. p. 485.

Time-Temperature relations in different types of Peach-rot Infection. C. Brooks and J.S. Cooley. 328
J. Agric.Res. 37 (1928). No.9. pp. 507-43.

Low Temperature and Scab infection of the Olive (Trans.title) S. Mercuri. 423
Lavoro d'Ital. Agric. 19th Aug. 1928.
Rev. in Met.prat.Montecassino 9 (1928) No.4. pp. 165-6.

Relation of Temperature to Spore Germination and Growth of the Onion Smut Fungus. J.C. Walker and F.L. Wellman. 90
J.Agric.Res. 32 (1926) No.2. pp.133-46.

The Influence of Temperature and Soil Moisture on Cotton Root Rot. J.J. Taubenhaus and B.F. Dana. 401
Bull.Tex.Agric.Expt.Sta. No.386. 1928.

INSECTS/

INSECTS AND PESTS.

Thermal Summation Rule and its relation to agricultural pests. 513
(Trans.title) O.Watzl.
Fortschr.Landw. 2.11. pp.350-4.
Abst. in Biol.Abst. 3. (1929). No.9-11. p.1959.

The Temperature requirements of Insects (Trans.title).
E. Janisch.
Pfluger's Arch. 209 (1925). 2 & 3. pp.414-36.

The dependence of Insects upon Temperature. I. The critical Temperature of some Insects (Trans.title).F.S. Bodenheimer and D.Schenkin.
Z.vergl.Physiol. 8. 1928.

Some Phases of the relation of Temperature to the Development 278 ~~279~~
of Insects. L.M. Peairs.
Bull.W.Virginia.Agric.Expt.Sta. 208.1927.
Abst. in Expt.Sta.Rec. Wash.58. No.8. pp.753-4.

Determination of the natural Undercooling and Freezing-Points 604
in Insects. W. Robinson.
J.Agric.Res.37. No.12. pp.749-55.

On Predicting the Development Cycle of Insects.F.S.Bodenheimer. 28
Bull.Soc.ent.Egypte. 1924. No.2-4. pp.149-57.
Abst. in Rev.Appl.Ent. 13A (1925). Pt.8. pp.389-90.

On the Chain Line and Exponential Curve in general as examples 424
of the Influence of Warmth on the Duration of Development
of Insects. (Trans.title). E.Martini.
Z. angew.Ent. 14. Pt.2. pp.273-84.

On Formulae for indicating the Effect of Temperature on Insect Development. E. Martini.
Z.angew.Ent. 11. No.2. pp.301-5.
Abst. in Rev.Appl.Ent.13A. (1925). Pt.10. p.481.

An apparatus for the study of comparative effects of constant 555
versus variable Temperatures on the speed of Insect metabolism.
T.G. Headlee.
J.N.Y.Ent.Soc.37 (1929). No.1. pp. 25-9.
Abst. in Expt.Sta.Rec.Wash.61. No.7. p.655.

Response and adaptation of Insects to external stimuli 452
(Temperature and Moisture) W. Robinson.
Ann.Ent.Soc.Amer. 21 (1928) No.3. pp.407-17.
Abst. in Expt.Sta.Rec. Wash.60. (1929) No.9. p.839.

Observations on the Causes (Humidity and Air Temperature) 458
of Night Activity in some Insects. H. Necheles.
Chinese J. Physiol. 1. No.2. pp.143-56.
Abst. in Rev.Appl.Ent. 17A. (1929).Pt.7. p.411.

The effect of Environmental Temperatures upon Insect Freezing 104
Points. N.M. Payne.
Ecology 7. (1926). No.1. pp.99-106.
Abst. in Expt.Sta.Rec.Wash.54. No.6. p.551.

Absolute Humidity as a Factor in Insect Cold Hardiness with 526
a note on the Effect of Nutrition on Cold Hardiness.
N.M. Payne.
Ann.Ent.Soc.Amer. 22. No.4. pp.601-20.
Abst. in Rev.Appl.Ent. 18A. (1930). Pt.4. pp.166-7.

On the Resistance/

On the Resistance of Insects to Cold. N.Sakharov. 416
J. Expt.Agron.S.E.Russia. Saratov. 6 (1928) No 2.
Summary in German.
Abst. in Rev.Appl.Ent. 17A. (1929) Pt.2. p.126.

Freezing and Survival of Insects at Low Temperatures. 193
N.M. Payne.
J. Morph. 63 No.2. pp.521-46.

Two Factors of Heat Energy involved in Insect Cold 206
Hardiness. N.M. Payne.
Ecology 8. No.2. pp.194-6.
Abst. in Rev.Appl.Ent. 15A. (1927). Pt. 9.p.457.

Measures of Insect Cold Hardiness. N.M.Payne. 207
Biol.Bull.Woods.Holl. 52. No.6. pp.449-57.
Abst. in Rev.Appl.Ent. 15A. (1927). Pt.9. pp.457-8.

What Factors regulate in nature the Number of 483
Individuals of an Insect Species? (Trans.title)
(Temperature and Humidity). F.S. Bodenheimer.
Biol.Zbl. 48 No.12. pp.714-39.
Abst. in Rev.Appl.Ent. 17A. (1929).Pt.9. p.489.

Some effects of Temperature on Bee activities. 605
E.F. Phillips.
Rep. Iowa Apiarist 1927. pp.43-6.
Abst. in Biol.Abst. 4. (1930) No.3. p.883.

The Influence of External Temperature on the Hive 492
Temperatures during the Summer. W.E. Dunham.
J.Econ.Ent. 22. (1929). No.5. pp.798-801.

Influence of Temperature on the number of eggs in
Lepidoptera. H. Eidmann.
Int. Cong. Ent. 4 (1928) 2.

Control of gamic and parthenogenetic reproduction in
winged Aphids by Temperature and Light (Trans.title)
A.F. Shull.
Z.indukt.Abstamm.u.Vererb Lehre 55 No.1-2. pp.108-26.

The effect of Intensity and Duration of Light and of 487
Duration of Darkness, partly modified by Temperature, upon
Wing-production in Aphids (Trans.title). A.F. Shull.
Arch.Entiv.Mech.Org. 115. Nos.4-5. pp. 825-51.
Abst. in Rev.Appl.Ent. 17A. (1929). Pt.9. p.490.

The Influence of Temperature and Atmospheric Moisture
on the length of the Egg-stage. I. Contribution to an
exact biology of Sitona Lineata L. (Trans.title).
K.T. Andersen.
Z.Morphol.Oekol.Tiere 17. No.4. pp.649-76.

Heat and Time of Exposure necessary to kill larvae of the 581
European Corn Borer in ear corn. G.W. Barber.
Circ.U.S. Dept.Agric. No.71. (1929).
Abst. in Expt.Sta.Rec.Wash. 61. No.9. p.852.

The Dependance of the Wheat Stem Fly on Temperature 99
(Trans.title). R. Kleine.
Z.Wiss Insekt.Biol. 21. No.4-5. 1926. pp.91-8.
Abst. in Rev.Appl.Ent. 14A. (1926). Pt.8. p.377.

Some

Some Data relative to the Relationship of Temperature to Codling Moth Activity. T.G. Headlee. 417
J.N.Y.Ent.Soc. 36. (1928) pp.147-63.

The Effects of Temperature on the development of the Japanese Beetle (Popillia japonica, Newm) D.Ludwig. 402
Physiol.Zool.1, (1928). No.3. pp.358-89.

Development of Cold Hardiness in the Larva of the Japanese Beetle (Popillia japonica, Newm) D. Ludwig. 329
Ecology 9 (1928) No.3. pp.303-6.
Abst. in Rev.Appl.Ent. 17A. (1929). Pt.1. p.41.

Cold Hardiness in the Japanese Beetle (Popillia japonica, Newm.). N.M.Payne. 330
Biol.Bull.Woods Holl. 55 (1928) No.3. pp.163-79.

Some Temperature relations of Melanotus. B.B.Fulton. 322
J.Econ.Ent. 21. (1928). No.6. pp.889-97.

Relation of Temperature to the Growth of the Oriental Peach Moth. (Trans.title) I.C. Harukawa. 584
Ber.Ohara.Inst. 4. (1929). No.1. pp. 67-94.
Abst. in Expt.Sta.Rec.Wash. 62. No.1. p.58.

Metamorphosis and Reproduction in Apterous forms of Myzus persicae Sulzer as influenced by Temperature and Humidity. A. Weed.
J. Econ.Ent. 20 (1927). No.1. pp. 150-7.

The Influence of Temperature and Humidity upon the Development of the Houghton Gooseberry Aphis. D.M.De Long and A.A. Matthewson.
J.Econ.Ent.18 (1925). No.1. pp. 172-6.

The Effect of Temperature on Sugar Cane Insects in Queensland. E. Jarvis. 514
Qd.Agric.J. 32. Pt.4. p.383.
Abst. in Rev.Appl.Ent. 18A (1930) Pt.3. pp.106-7.

The effect of Low Temperatures on the Common Bean Weevil. W. Carter. 105
J. Agric. Res. 31 (1925). No.2. pp.165-182.

Low Temperature and Moisture as factors in the ecology of the Rice Weevil, Sito hilus oryza L. and the Granary Weevil Sitophilus granarius L. 538
W. Robinson.
Tech.Bull.Min Agric.Expt.Sta. No.41.
Abst. in Expt. Sta. Rec. Wash. 57. No.4. p.363.

Relative Resistance of the Rice Weevil (Sitophilus oryza L.) and Granary Weevil (S.granarius L.) to High and Low Temperatures. E.A. Black and R.T. Cotton. 1
J.Agric.Res. 28 (1924) No.10. pp. 1043-4.

The Effect of the extreme Temperature of December 7th, 8th and 9th, 1927, on hibernating Crioceris asparagi L. and Hippodamia convergens, Guer. at Ames,Iowa. R.Latta. 439
Psyche. Camb.Mass. 35. No.4. pp.229-31.
Abst. in Rev.Appl.Ent. 17A. (1929), Pt.5. p.276.

The Influence

The Influence of Temperature on the Maturation and General Health of Locusta Migratoria L.V.P. . Pospelov. Bull.Ent.Res. 16 (1926) Pt.4. pp.363-7. 67

Determining the effects of Change of Temperature upon the locomotor movements of Fly Larvae. D.F. Miller. J. Exp.Zool. 52 (1929). No.2. pp.293-313. Abst. in Expt.Sta.Rec. Wash 61. No.9. p.855. 582

Observations on the Thermal Death Point of the Blow-Fly at different Relative Humidities. M.V.N. Beattie. Bull.Ent.Res. 18 (1928) Pt.4. pp.397-403. 256

On the Effects of Exposure to Raised Temperatures upon the Larvae of certain British Mosquitoes. W.Rees Wright. Bull.Ent.Res. 18 (1927) Pt.1. pp.91-4. 201

The critical minimum Temperature of hibernating Mosquitoes (Trans.title) A.W. Maslow. Arch.Schiffs-u. Tropenhyg. 34. No.3. pp.170-3. Abst. in Rev.Appl.Ent. 18B (1930) Pt.7. 607

Relation between Temperature, Humidity, and Activity of House Mosquitoes. W. Rudolfs. J.N.Y.Ent.Soc. 33 (1925) No.3. pp.163-9. Abst. in Rev.Appl.Ent. 13B (1925). Pt.12. p.185. 56

Effect of Temperature on Natural Enemies of Mosquitoes in Cisterns. T.R. Shaw. Pub.Hlth.Bull.Wash. No.156. Aug.1925. pp.65-71. Abst. in Rev.Appl.Ent. 15B (1927). Pt.6. pp.109-10.

Some Effects of Alternating Temperatures on the Growth and Metabolism of Cutworm Larvae. W.C. Cook. J.Econ.Ent. 20 (1927). No.6. pp.769-82. 222

Optimum Feeding Temperatures for the Dark-sided Cutworm. A.V. Mitchener. Sci.Agric.C. (1928) No.6. pp.370-5. Abst. in Rev.Appl.Ent.16A (1928). Pt.7. p.330. 277

The Relation of Temperature Light and Humidity to the Behaviour and Longevity of a Joint Worm Parasite. C.H. Brannon. J.Elisha Mitchell.Sci.Soc.42 No.142. pp.99-108. Abst. in Rev.Appl.Ent. 15A (1927) Pt.7. p.391. 194

ANIMALS.

Temperature as an Ecological Factor in Animals. R.N. Chapman. Amer.Nat. 62 (1928) No.681. pp.298-310.

Temperature and the Food Requirements of Animals. T.B. Wood. Rep.Agric.Met.Conf.Lond. 1927. pp.71-2.

The Influence of the Environmental Temperature on the Heat Production of Cattle. E.B.Forbes. W.W.Braman and M. Kries. J. Agric.Res. 33. (1926) No.6. pp.579-89. 122

The Effect

The Effect of Environmental Temperature on the percentage of Fat in Cow's Milk. W.P. Hays. 186
J. Dairy Sci. 9. (1926) No.2. pp.219-35.
Abst. in Expt.Sta.Rec.Wash. 56. No.2. pp.170-1.

Influence of Cold on Productivity of Milch Cows (Trans. title) I.S. Popoff. 500
Z. Tierzücht.u.Züchtbiol. 10.2. pp.285-91.
Abst. in Biol.Absts. 3 (1929) No. 7-8. p.1417.

Influence of Variations in External Temperature on Energy Exchange of the Goat. H.E. Magee.
J.Agric.Sci. 14. Pt.4. pp.506-15.

Preliminary Report on Observations on the Development of Ova of Pig and Human Ascaris under natural conditions and studies of factors (Temperature and Humidity) influencing development. F.C.Caldwell and E.L.Caldwell. 501
J.Parasit. 14. 4. pp. 254-60.

The Influence of Temperature on the development of Ascaris eggs. (Trans.title) M.M. Zavadovskii and K.M. Sidorow. (English Summary). 515
Trans.Lab.Exp.Biol.Zoopark. Moscow, 3. (1927) pp.159-82.
Abst. in Biol.Abst. 3. (1929). No.9-11. - p. 1928.

The effect of a Temperature gradient on the early development of the Chick. M.A. Tazelaar. 608
Quart. J. Micr.Sci. 72. No.3. pp. 419-46.
Abst. in Biol.Abst. 4. (1930). No.3. p.706.

The Critical Temperature of the Chicken. H.H. Mitchell and W.T. Haines. 185
J.Agric.Res. 34 (1927) No.6. pp.549-57.

Effect of Temperature and Humidity on the susceptibility and resistance to Tuberculosis in Guinea-pigs. 321
A.M. Baetjer and L.B. Lange.
Amer.J.Hyg. 8 (1928). p.935.

ANIMAL PRODUCTS.

The Effect of Temperature on the Keeping Quality and Bacterial Content of Milk. H. Barkworth.
Rep.Agric.Met.Conf.Lond. 1927. pp.31-9.

The Deleterious Effect of Freezing on Several of the Physical Properties of Milk. W.H.E. Reid.
Bull.Missouri Agric.Expt.Sta. No.100 (1927).

Influence of Temperature on the Honey Flow. 606
A.V. Mitchener.
Amer.Bee J. 47. No.3. pp. 120-1.
Abst. in Biol.Abst. 4 (1930) No.3. p.883.

MISCELLANEOUS.

Temperature and Life (Trans.title). A. Kanitz.
Gebruder Brontraeger. Berlin. 1915.

The Complex Nature of the Effects of Temperature on the Rates of certain Biological Processes. M.H. Jacobs. 303
Amer.Nat. 62 No. 681. 1928. pp.289- 97.

A general

A general formula expressing the action of Temperature in Biological Processes (Trans. title). J.Belehradek. 312
C.R. Soc.Biol. 95 (1926) 36. pp. 1449-52.
Abst. in Biol. Abst. 2. (1928) No.3-5. p.472.

Observations on certain bioclimatically important Temperatures (Trans.title). V. Novak. 552
Bull.Czechoslovak.Acad.Agri. 4 (1928). No.9. pp.802-7.
German abstract pp. 805-7.
Abst. in Expt.Sta.Rec.Wash. 61. No.7. p.613.

On the Technique of studying Temperature as a Biological Factor (in Russian) N.N. Troitzky.
Morbi Plantarum, Leningrad. 13. No. 3-4. pp. 88-97.

Temperature and Anthesis. W.A. Setchell. 58
Amer.J.Bot. 12 (1925) pp. 178-88.
Abst. in Bot.Abst. 15 (1926). No.1. p.68.

Wound Periderm Formation in the Potato as affected by Temperature and Humidity. E. Artschwager.
J.Agric.Res.35. (1927) No.11. pp. 995-1000.

The behaviour of nitrifying bacteria under high Temperature (Trans.title). M.M. Kononoff. 434
Ann.State Inst.Expt.Agron.5. No. 2 & 3. 1927.
Abst. in Ann.Sci.Agron. 46 (1929). No.2. p. 20[illegible] and in Biederm.Zbl. 58 (1929). No.1. pp. 37-8.

Relation of Temperature to Rate and Type of Fermentation and to Quality of Commercial Sauerkraut. H.B.Parmele. E.B. Fred, W.H. Peterson, J.E. McConkie and W.E. Vaughan.
J. Agric.Res. 35. (1927) No.11. pp.1021-38.

A Statistical Analysis of the daily observations of the Maximum and Minimum Thermometers at Rothamsted. T.N.Hoblyn.
Quart.J.R.Met.Soc. 54 (1928). No.227. pp.183-202.
Rep.Agric.Met.Conf.Lond. 1927. pp.9-14.

A Comparison of the Minimum Temperatures as recorded by Grass Minimum Thermometers set Over Shingle and Grass at Felixstowe. C.W. Lamb. 123
Quart.J.R.Met.Soc. 52(1926). No.220. pp.427-8.

On the use of a Sward-forming Plant in connection with the observation of thermometers on grass (Trans.title) M.Marcel. 425
Met. Paris, 4 No.35. pp. 60-1.

Inter-relation of Relative Day Length and Temperature. B.E. Gilbert. 216
Bot.Gaz. 81 (1926). No.1. pp. 1-24.
Abst. in Expt.Sta.Rec. Wash. 57. No.1. p.23.

Daily and Seasonal Air and Soil Temperatures at Davis, California. A. Smith. 646
Hilgardia. 4. (1929) No.3.

A Contribution

A Contribution to the study of Inter-relations between the Temperature of the Soil and of the Atmosphere. A. Smith. 208
Soil Sci. 22 (1926). No.6. pp. 447-57.
Abst. in Expt.Sta.Rec.Wash. 56. No.7. p.620.

A comparison of Air and Soil Temperatures at Lincoln, Nebraska. H.G. Carter.
Mon.WeathRev. Wash 56 (1928). No.4. pp.138-9.

Comparisons of Day-time and Night-time Soil and Air Temperatures at Davis, California. A. Smith. 648
Hilgardia. 4. (1929) No.10.

The Relation between Air Temperature and Soil Temperature at various depths at Long Ashton. F. Tutin.
Rep.Agric.Met.Conf.Lond. 1928. pp. 57-62.

Relation of (Air-) Temperature to the amount of Nitrogen in Soils. H. Jenny. 556
Soil.Sci. 27 (1929). No.3. pp. 169-88.
Abst. in Expt.Sta.Rec.Wash. 61. No.4. p. 316.

Frost and the Prevention of Frost Damage. F.D. Young 656
Fmrs' Bull. Wash. No. 1588.

Meteorological Field Experiments on means of Protection against Frost (Trans.title). W. Schmidt.
Jahrb.Zent.Anst.Met.Wien. 1927. Suppl.Pub.No.135.

Spring and Autumn Night Frosts viewed as problems of Agricultural Meteorology. K. Szulc.
Prace Meteor.hydr.Serja.F. Warsaw.1(1924) (Prelim.note).
In Polish, French Summary

Experience and observations in respect of communal defence against night Frosts (Trans.title).
Geisenheim.Mitt.Obst. -u.Gtb. 43 (1928). No.10.

Defensive measures against Spring Frosts in the neighbourhood of Cavaillon (Trans.title) H.Ayme.
J.Agric.prat. Paris 49 (1928). No.19. pp. 371-3.

The action of Frost on the solubility of Phosphoric Acid and Calcium (Trans.title). B.Batz.
Z.Pflanzenern.Dung.Boden (1927). Pt.9. p.385.

Potash manuring and the danger of night Frost (Trans.title) 541
G.G. Bolhuis.
Landbouwk. Tijdschr. Groningen. 40 (1928) pp. 172-4.
Abst. in Ann.Sci.Agron. (1930). No.2. p.290.

Influence of Temperature and Humidity upon the Volatilisation of Nicotine from Tobacco-Dust-Lime-Hydrate Mixtures. L.R. Streeter.
J.Econ.Ent. 18 (1925) No.4. -pp.590-3.
Abst. in Rev. App' Ent. 13A. (1925). Pt. 10. p.511.

Constant temperature and humidity chambers. J.Johnson 106
Phytopathology. 18 (1928) No.2. pp. 229-38.

S O I L T E M P E R A T U R E.

PLANTS.

On the Phenomena (Water and Heat) assisting Germination 432
(Trans. title). J.Dufrenoy.
C.R. Soc. Biol., Paris. 98. 1928. pp. 1497-8.
Abst. in Ann. Sci. Agron. 46 (1929). No. 2.p.232.

Temperature relations to Germination of Vegetable Seed. 261
F.Kotowski.
Proc. Amer. Soc. Hort. Sci. 23 (1926). pp. 176-84.
Abst. in Expt. Sta. Rec. Wash. 58. No. 6. p.535.

Alternation of Soil Temperature and Germination of 502
Vegetable Seed. F.Kotowski.
Acta. Soc. Bot. Poloniae 5.1 pp. 71-8.

The Relation of Soil and Air Temperatures in their 260
influence on Crop Returns (Trans. title) H.Kaserer.
Fortschr. Landw. 2. (1927) No. 7 pp. 205-12.
Abst. in Int. Rev. Sci. Prac. Agric. 18.ns. (1927)
No. 5. pp. 258-9.

Influence of Plant Cover (Winter Wheat) on the 609
Temperature of the surface Soil and the Temperature
and Moisture of the Air. (Trans. title). A.Kameneff.
Mem. Inst. Agron. Leningrad. 5(1929) No. 5.pp.43-75.
German Abstract on pp.74-5.
Abst. in Expt. Sta. Rec. Wash. 62 No. 4 p.313.

Wheat Germination Studies with particular reference 163
to Temperature and Moisture Relationships. H.K.Wilson
and C.F. Hottes.
J.Amer.Soc. Agron. 19 (1927) No. 2 pp. 181-90.

Wheat, Soybean and Oat Germination Studies with 287
particular reference to Temperature Relationships.
H.K.Wilson.
J.Amer. Soc. Agron. 20(1928) No. 6 pp. 599-619.

Low Temperature and Root Injury of the Apple.
Amer. Fruit Gr. 45 (1925) No. 12.

Air Temperature and Soil Temperature Requirements of the 498
Tomato under Glasshouse conditions. W.Corbett and W.F.
Bewley. Rep. Exp. Res. Sta. Cheshunt 1928, pp. 115-21.

(Soil) Temperature experiments in germinating 585
orange seeds. H.S.Fawsett.
Calif. Citrograph 14 (1929). No. 12. p. 515.
Abst. in Expt. Sta. Rec. Wash. 62 No. 3. p.231.

Relative Productivity of Seed Potatoes grown under 440
various controlled Soil Temperatures and Soil Moistures.
H.O.Werner.J.Agric. Res. 38 (1929) No. 7 pp.405-10.

On the Germination of the Seed of Spinach at Low 200
Temperatures. H.B.Sifton.
Ann. Bot. Oxford. 61 (1927) No. 163. pp.557-68.
(August 1927).

/The Relation

The Relation of Soil Temperature to the Germination and Growth of Cotton. A.F. Camp and M.N. Walker.
Bull. Florida Agric. Expt. Sta. No. 189. (1927) pp. 17-32.
Abst. in Expt. Sta. Rec. Wash. 58. No. 3. p.225.

Soil Temperatures under Cotton in Egypt. E.McKenzie Taylor. 233
J.Agric. Sci.17(1927) Pt. 4. pp. 489-501. (Feb.1928).

PLANT DISEASES.

Studies upon the Relation of Soil Temperature to Plant Disease. L.R.Jones,J.Johnson and J.G.Dickson. 195
Bull. Wisc. Agricl. Expt. Sta. No. 71 (1926).

Soil Temperature and Soil Moisture relations of Fusarium oxysporum var. medicaginis. J.L.Weimer. 507
J.Agric. Res. 40. (1930) No. 2. pp. 97-103.

Effect of Soil Temperature and Soil Moisture on Root Knot Disease. G.H.Godfrey. 109
J.Agric. Res. 33. No. 3. 1st Aug. 1926. pp.223-5[illegible].

Abst. in Expt. Sta. Rec. Wash. 59 No. 9. p.846.

On the Relation of Soil Temperature to Angular Leaf-spot of Cotton.R.E.Massey. 202
Ann. Bot. Oxford 61 1927. No. 163 pp. 497-507.

Relation of Soil Temperature to the Development of Cotton Wilt. V.H.Young. 403
Bull Arkans. Agric. Expt. Sta. No. 226. (1928).
Abst. in Expt. Sta. Rec. Wash. 59. No. 7. pp. 640-1.

Effects of Soil Temperature and Reaction on Growth of Tobacco infected and uninfected with Black Root Rot. 516
W.L.Doran.
J.Agric. Res. 39. (1929) No. 11. pp. 853-72.

ANIMALS.

Temperature as a factor in animal migration in Soil (Trans. title). E.Handschin.
Verh. Naturf. Ges. Basel.1929.

The Effect of Soil Temperature on the Behaviour and Migration of Soil Fauna. E.Handschin.
Rep. Agric. Met. Conf. Lond. 1928. pp. 83-9.

MISCELLANEOUS.

The Resistance of the Micro-organisms of the Soil to the Low Temperaturesof the Winter of 1928-29 (Trans. title). 650
E.Demoussy.
Ann. Sci. Agron. 46 (1929). No. 4.pp.395-9.

Effect of Moisture Temperature and other Climatic Conditions on R.leguminosarum in the soil. S.C. Vandecavcye. Soil Sci. 258
23 (1927) No. 5. pp. 355-62.
Abst. in Expt. Sta. Rec. Wash. 57. No. 9. p.812.

Temperature as a factor in Nitrogen Changes in the Soil.
E.H.Panganiban.
J.Amer. Soc. Agron. 17 (1925) No. 1. pp. 1-31.

The Effect

The Effect of Irrigation upon Soil Temperature.
E.McK. Taylor.
Bull. Tech. Sci. Serv. Cairo No. 53. 1924.
Abst. in Expt. Sta. Rec. Wash. 53. No. 4. p.318.

Influence of Moisture on Soil Temperature. F.Shreve. 166
Yearb. Carnegie Instn. 24. 1924-25.
Abst. in Expt. Sta. Rec. Wash. 55. No. 7. p.629.

The Temperature of Soil under Snow Cover (Trans. title) 586
K.Opitz.
Fortschr. Landw. 4 (1929) No. 8. p.225-7..
Abst. in Ann. Sci. Agron. 46 (1929) No. 6.

Influence of the Incorporation of Manure on Soil Temperature
(Trans. title).
J Agric. Prat. Paris. n.s. 40 (1923) No. 46 pp. 389-90
No. 47 pp. 416-8.
Abst. in Expt. Sta. Rec. Wash. 51. (1924) No. 4. p.325.

Influence of Slope Exposure on Soil Temperature. F.Shreve
Yearb. Carnegie. Instn. 23. 1924. p.140-1.

Effects of Forest litter on Soil Temperature and soil 557
freezing in autumn and winter. A.L.MacKinney.
Ecology 10 (1929) No. 3. pp. 312-21.
Abst. Expt. Sta. Rec. Wash. 61. No. 7.p647.

Soil Temperature as influenced by Forest Cover. 209
T.T. Li.
Yale For. Sch. Bull. 18. 1926.
Abst. in Expt. Sta. Rec. Wash. 56. (1927) No.9. pp.837-8.

Some Measurements of Temperatures near the Surface in
various kinds of Soils. N.K.Johnson and E.L.Davies.
Quart. J.R. Met. Soc. 53. No. 221. Jan. 1927. pp. 45-59.

Thermal diffusivity and conductivity of some soil
materials. L.R.Ingersoll and O.A. Koepp.
Phys. Rev. 24. 1924. pp. 92-3.

The Heat conductivity of Sand. (Trans. title) F.Roll.
Z.P.fl Ernährung. u.Boden. 12 (1928) 3.

Electrical Soil Heating (trans. title). W.Kind. 610
Tech. Landw. 10 (1929) No. 12 pp. 285-90.
Abst. in Expt. Sta. Rec. Wash 62. No. 7 p.672.

Heating Glasshouse Soils by buried Electric Heating
Cables. W.F.Bewley.
Rep. Agric. Met. Conf. Lond. 1928. pp. 91-3.

The necessity of measuring Soil Temperature in the 558
course of Field and Greenhouse experiments (Trans.
title) P.I.Andrianow.
J.Landw. Wiss.4 (1927) No. 12.pp. 819-28 English Abst.
p.828.
Abst. in Expt. Sta. Rec. Wash. 60. No. 8. p.709.

/Comparisons

Comparisons of Daytime and Nightime Soil and Air Temperatures at Davis, California. A.Smith. 648
Hilgardia, 4 (1929) No. 10.

The Relation between Air Temperature and Soil Temperature at various depths at Long Ashton. F.Tutin.
Rep. Agric. Met. Conf. Land. 1928. pp. 57-62.

A comparison of Air and Soil temperatures at Lincoln, Nebraska, H.G.Carter.
Mon. Weath. Rev. Wash. 56. (1928) No. 4. pp. 138-9.

Daily and Seasonal Air and Soil Temperatures at Davis, California. A.Smith. 646
Hilgardia. 4. (1929) No. 3.

The Temperature of cultivated soil at Giza. W.S.Gray and A.A.Nassar. 444
Bull. Tech. Sci. Serv. Cairo. No. 79. 1928.
Abst. in Expt. Sta. Rec. Wash. 60. No. 9. pp.802-3.

Diurnal, Average and Seasonal Soil Temperature changes at Davis, California. A.Smith.
Soil Sci. 28.(1929) No. 6. pp.457-68.

Soil Temperatures in Saskatchewan. E.L.Harrington.
Soil Sci. 25. (1928) No. 3. pp. 183-94.

Soil Temperatures in Egypt. E.McKenzie Taylor. 241
J.Agric. Sci. 18 (1928) Pt. 1. pp. 90-122.

Permanently Frozen Soil in the boundaries of U.S.S.R. M.Soumgin.
Far East Geoph. Obs. Vladivostock. 1927.
Rev. in Nature, Lond. 123.11th May, 1929. pp. 741-2.

A Contribution to the Study of Interrelations between the Temperature of the Soil and of the Atmosphere. A.Smith. 208.
Soil Sci. 22. (1926) No. 6. pp. 447-57.
Abst. in Expt. Sta. Rec. Wash.56 No. 7. p.620.

Systematic investigation into the influences of cultivated varieties of Plants and the working of the Soil on the Water Content and Temperature of the Soils of the experimental fields of the Institute for Field and Plant Cultivation at Dahlem and their relations to the meteorological data of the local weather station (trans. title) 546
F.Bocksch.
Landw. Jahrb. 69. 1929, pp. 693-787.

SOIL MOISTURE.

PLANTS.

On the Phenomena (Water and Heat) assisting Germination (Trans.title). J.Dufrency. 432
Q.R.Soc.Biol., Paris. 98 (1928) pp. 1497-8.

22 (1926) No. 3. pp. 233-52.

Absorption Capacity of the Soil. Apparatus for Measurement. Automatic Regulation (Trans. title) B. J. Korneff.
Ann. Sci. Agron. 43 (1926) No. 5. pp. 353-85.

Irrigation

Irrigation in Italy (Trans. titlo)
Publ. Min. Lavori, Roma.1
(1926) No. 8.

Effect of Pumping from deep wells on the Water Table, W.W. Weir. 196
J.Agric. Res. 34. (1927) No. 7.
pp.663-72.

The Normal Moisture Capacity of Soils. 263
C.F.Shaw.
Soil Sci. 23 (1927) No. 4. pp.303-17.
Abst. in Expt. Sta. Rec. Wash. 57, No.8.
pp.711-2.

Terracing for (Soil) Moisture conversation, H.H.Finnell. 561
Bull. Panhandle Agric. Expt. Sta. 2 (1929) pp. 13-6.
Abst. in Expt. Sta. Rec. Wash. 61.
No. 1, p.77.

Factors influencing Soil Moisture regulation 1. Soil moisture forms, absorption and retention. R.W. Trullinger. 264
Agric. Eng. Ames. 1a.8 (1927), No. 6.pp. 135-9.
Abst. in Expt. Sta. Rec. Wash. 57, No. 9, p.880.

Factors influencing Soil Moisture regulation II. Soil Moisture losses and factors in prevention. R.W. Trullinger, 265
Agric. Eng.Ames.1a.8.(1927),No. 7, pp.183-6, 193.
Abst. in Expt. Sta. Rec. Wash 58, No. 6, p.582.

Contribution to the study of Dew and of Secondary Sources of Soil Moisture (Trans. title) L.Chaptal. 281
Ann. Sci. Agron. 45, (1928),No. 2,pp.134-54. (July 1928).

The movement of water in the soil (Trans. title) E.Rossi. (Ann. Tec. Agr. 4. 1st April,1929.

The usefulness of Capillary Potential to Soil Moisture and Plant investigators. L.A.Richards. 612
J.Agric. Res. 37. No. 12 pp.719-42.

Notes on Capillary Rise in Soils. 70
C.V. Garola and Chartres.
Ann. Sci. Agron. 1. 1925, pp.1-32.
Abst. in Int. Rec. Sci. Prac. Agric. n.s. 3 (1925), No. 3, p.732.

The Cohesion

The Cohesion developed by Capillary Forces in an Ideal Soil. W.B.Haines. J.Agric. Sci. 15 (1925), Pt. 4, pp. 529-35. 37

The Effect of the Size of the Container upon the Capillary rise in Soil Columns. H.A.Wadsworth and A.Smith. Soil Sci.22 (1926) No. 3, pp. 199.211.

Effect of Moisture, Temperature and other Climatic Conditions on R. Leguminosarum in the Soil. S.C. Vandecaveye. Soil. Sci.23 (1927) No. 5, pp. 355-62. Abst. in Expt. Sta. Rec. Wash. 57, No. 9, p.812.

The Effect of Soil Storage and Water Content on the Protozoan Population. D.Cutler and A.Dixon. Ann. Appl. Biol. 14 (1927) No. 2, pp. 247-54. 178

Soil Moisture Investigations in Canada. E.S.Hopkins, Sci. Agric. 5 (1924) No. 3. pp. 79-83. 21

Soil Moisture studies under Dry-Farming Conditions in Canada. S.Barnes, Sci. Agric. 8. (1928) No. 9, pp. 570-5. 254

Influence of Forest Formation upon Soil Moisture. J.Phillips. Nature Lond. 122. 14th July, 1928, pp.55-4.

Systematic investigation into the influences of cultivated varieties of Plants and the working of the Soil on the Water Content and Temperature of the Soils of the experimental fields of the Institute for Field and Plant Cultivation at Dahlem and their relations to the meteorological data of the local weather station (Trans. title) F.Dockson. Landw. Jahrb. 69 (1929), pp.693-787.

PRECIPITATION.

PLANTS.

The Plant in relation to Water. A study of the Physiological Basis of Drought Resistance. N.A.Maximov. London: Allen and Unwin, 1929.

Water requirements of Plants (Trans. title) W.Halbfass. Int. Rev. Hydrobiol 15. (1926) 34. pp. 264-7. Abst. in Biol. Abst. 2. (1928) No. 1-2. p.28. 258

Use

Use of Water by cultivated Plants in the Field N.Tulaikov. J.Agric. Sci. 19. (1929) Pt. 1. pp. 1-16. 441

The relation between the Rains and the Zones of Vegetation in Morocco (Trans. title) L.Joleaud. Nature, Paris 53. 2 1925 pp. 293-301.

Influence of Temperature and Precipitation on Vegetation (Trans. title) W.Grosse. Met.Z.43.(1926) No. 9. pp. 352-5.

Rainfall Interception by plants. J.Phillips. Nature Lond. 118. 11th Dec. 1926. pp.837-8. Nature, Lond. 10th Mar. 1928. pp.354-5. 154.

Dry and Wet Spells during the growth period in Central North Germany (Trans. title). C.Kassner. Landw. Jahrb. 69 No. 3. pp.429-51. 548

The Respiration of certain Lower Plants, with special reference to the Influence of Drought. J.Fraymouth. Ann. Bot. Oxford. 42 (1928) No. 165. pp.75-100.

The Dependence of the Yields of Crops on Rainfall and Temperature (Trans.title) E.Less. Landw. Jahrb. 64. (1926) 2 pp. 241-96.

The Relation between Crop Yields and Precipitation in the Great Plains area. E.C.Chilcott. Misc. Circ. U.S. Dept. Agric. 81.1927. Abst. in Expt. Sta. Rec. Wash. 56. No. 8.p.730. 203

Rainfall and the Yield of Crops (Trans. title) C.Kassner. Mitt. Deuts. Landw. Ges. 44. No. 28. pp. 630-1.

The Relation between Precipitation and Yield in Lower Bavaria. (Trans. title). Met. Z. 41 (1924) No. 6 pp. 170-3. Abst. in Expt. Sta. Rec. Wash. 51. (1924) No. 6. p.509.

The Drought of the summer of 1928 and its repercussions on the principal Crops. (Trans. title). J.Sanson. Bull Agric. Paris. 48. Nov., 1928. pp. 27-9. Met. Paris. 5 n.s. (1929) pp.34-46.

On the

On the non-correlation in France between Rainfall and Harvest (Trans. title) R.De Montessus de Ballore.
Met. Paris 2. (n.s.) 1926. pp. 412.4.

Rainfall and Crop Conditions. H.M.Leake.
Trop. Agric. Trinidad 6 (1929). No.2. pp.43-5; No. 3.pp.74-7.

Watering of Crops in Central Germany (Trans. title) H.Martiny.
Ach. Deutc. Landw. Ges. 354.

A preliminary study of Crop Yields and Rainfall in the Transvaal.D.G. Hayleett.
Bull. Univ. Coll. Transvaal No.19, 1920.

The Weather Influence on Crop Production in regions of Scanty Rainfall. W.A. Mattice. 126
Mon. Weath.Rev. Wash. 54. (1926) No. 8. pp.336-41.

The Tillering of Grain as related to Yield and Rainfall. P.W.Smith. 43
J.Amer. Soc. Agron. 17 (1925) No. 11. pp.717-25.

The Influence of Dry Periods on the Spring Wheat variety "Ulca" in various growth stages (Trans. title). M.Chiritescu-Arva. 331
Landw. Jahrb. 68 (1928) 3. pp.407-22.

On a Relation existing between the three Climatic Factors, Rain, Temperature and Light and the Yield of Wheat at Rennes (Trans. title). H.Goslin. 533
C.R.Acad. Agric. Fr. 16 (1930) No. 14. pp.513-20.

The Influence of Rainfall on the Yield of Wheat at Rothamsted.R.A.Fisher. 4
Philos. Trans. Ser. B.213 pp.89-142.

Wheat Yield and Rainfall in Ohio. F.A. Welton and V.H.Morris.
J.Amer. Soc. Agron. 16 (1924) No. 11 pp. 731-749.

Relations between Annual Rainfall and the Yield of Wheat per hectare in France (Trans. title)
Met. Paris (n.s.) 4th Feb. 1928.p.71.

Influence

Influence of Water (Rain and Irrigation) on Wheat and Oats before and after flowering (Trans. title) A.Rivier. 618
Ann. Sci. Agron. 1926.pp.303-13.

Critical moisture periods for Wheat and Barley. 282
A.Ai. Moliboga.
Bull. Appl. Bot. & Pl. Breed. 17 (1927) No. 2. pp.183-202. English abstract on pp.201-2.
Abst. in Expt. Sta. Rec. Wash. 58.No.8. p.734.

Influence of Rainfall on the percentage of husk in Oats (Trans.title) R.Raynauld. 523
Sci. Agric.10.(1930) No.8.pp.543-6.

Maize Yield and Rainfall.
J.Dept. Agric.S.Afr. 8.(1924) No.3.p.268.
Abst. in Int. Rev. Sci. Pract.Agric. (n.s.) 11 (1924) No.4.p.882.

The Influence of Rainfall on the Yield of Maize at Blacksburg, Va.T.K.Wolfe. 14
J.Amer Soc. Agron.17 (1925) No.6 pp.356-362.

Rainfall and Maize Production (Trans. title) R.Fleischmann.
Idojaras 32. (1928) 4. pp.102-5.
German Summary pp.125-6.

Effect of Hail Injury on the Development of the Corn (Maize) Plant. G.H.Dungan. 304
J.Amer.Soc.Agron. 20 (1928) No.1.pp.51-4.

Effect of Drought on Maize (Trans.title).
F.Todaro and W.Mosneaga.
Ital. Agric. 66 (1929).No.1.

Geographical Distribution of the Flax growing districts in U.S.S.R. according to quality of fibre, with reference to Temperature and Rainfall during the growing period (Trans. title) A.D.Lebedev and A.F.Evert. (English summary). 474
Bull.Appl. Bot. Gen. and Plant Breed.18. No. 1.pp.371-96.
Abst. in Biol. Abst. 3 (1929).No.4-6.p.852.

Variations in the Sugar Content and in the rate of Growth of Sugar Beet in consequence of Rain (Trans. title) J.Urban. 177
Z.Zuckerind, Böhm.44. No. 39-40. pp.299-312.
Abst. in Int. Rev. Sci. Prac.Agric. 4 N.S. (1926) No.4 p.965

Grassland

Grassland as a source of Rainfall. 5
F.E.Clements.
Mon. Weath. Rev. Wash. 52 (1924) No.11.
p.541.
Abst. in Expt. Sta. Rec. Wash. 51.
No. 8. p.718.

Rainfall and the Nutritive Value of a Pasture. 102
H.E.Woodman,D.L. Blunt, and J.Stewart.
J.Agric. Sci. 16 (1926) Pt.2.pp.205-74.

Influence of Temperature and Rainfall on Trifolium pratense. (Trans. title)
G.Viggiani.
Nuovi Ann Minist.Agric. Roma. 6 (1926)
No.3-4 pp.565-91.

The water requirements of various grasses (Trans. title) Landw. Jahrb. 64.(1926) 155
Supp. Vol. 1.

A Line Survey of Grassland with reference mainly to Rainfall. 419
W.Burns and L.B.Kulkarni.
J.Ind.Bot. Soc. 6.
(1927) No. 3-4. pp. 103-8.

Investigations on the Water requirements of various Grasses (Trans. title) 323
Landw. Jahrb. 68 (1928) .Erganzungsband.
I.p.39.

Investigations on the Effect of the yield and behaviour of Meadows and Pastures of Various degrees of Rainfall combined with varying applications of Nitrogen. (Trans. title). 324
Landw. Jahrb. 68 (1928). Erganzungsband.
I.pp.39-44.

Rainfall and Spotting of the Foliage of the Apple. C.E.Mann and T.Wallace. 156
J.Pomology Hort. Sci.4. (1925) Nos. 3-4.
pp.146-61.

Influence of Summer Rainfall and Previous Crop on Fruiting of Apples.A.H.Lees.
J.Pomology. Hort. Sci. 5 (1926) No.3.
pp. 178-94.

A Forecast of the Annual Almond Crop based on the Air Temperature and Precipitation of the Three Months January to March.F.Erodia.
Rend. Acc. Lincei. 1925.
Abst. in Met. Prat. Montecassino.
(1925) pp.193-6.

The resistance

The resistance of Soft Fruit to Frost and Drought (Trans. title) - Gce. Obst-u. Gem. 1929.p.9.

Watering Experiment with Tomatoes. 294
Rept. Expt. Res. Sta.
Cheshunt. Ann. Rept. 1927. pp.15-19.

Indications of Existing Correlation 485
between the Rainfall and the number of Cacao pods harvested at Aburi and Asuansi. C.L.Skidmore.
Bull. Dept. Agric. Gold Cst.
No. 16 Year 1928 pp. 114-20.

The Cotton Plant in relation to Temperature and Rainfall.
J.B.Kincer.
Mon. Weath. Rev. Wash. 52 (1924)
No. 6 pp.306-7.

The Influence of Rainfall on the Yield of 228
Cotton at the Gezira Research Farm.
E.M.Crowther.
Rept. of Meeting in Sudan Gezira,Dec.1925.
pp.18-28.Khartoum 1926.
Rep. Rothamst. Exp. Sta. 1925-26.pp.67-9.

Correlation between Rainfall and Cacao Yields in the Gold Coast W.T.O.Maidment.
Bull. Dept. Agric. Gold Coast No. 13.
(Year book 1927) pp.83-4.

Forests and Precipitation. B.Moore. 619
Science 70 1806.pp.141-2.
Abst. in Biol. Abst. 4 (1930).No.4.
p.1019.

Rainfall Probability during the Forest Fire Season in Washington and Oregon.
T.T.Munger.
Mon. Weath. Rev. Wash. 53 (1925) No. 9.
pp.394-5.

Precipitation and Forest Fires in 157
Northern Minnesota.
J.A.Mitchell.
J.For. 24 (1926) No. 5. pp.507-10.
Abst. in Expt. Sta. Rec. Wash. 55.
No. 6. p.539.

Influence of Precipitation Cycles on 215
Forestry. R.Marshall.
J.For. 25 (1927) No. 4. 415-29.
Abst. in Expt. Sta. Rec. Wash. 57.
No. 1.p.46.

Growth of Trees in the Forest of Dean in relation to Rainfall.
Met. Mag. 63.(1928) pp.29-33.

PLANT

PLANT DISEASES.

Water deficiency and wilting of Plants as a means of increasing their resistance to Drought (Trans. title) I.I. Tumanov. Z.angew.Bot. Pflanzenzucht. 16 (1926) No.4. and in Z.wiss. Biol. abt. E. Planta 3. No. 2-3. pp. 391-480. Abst. in Z. Pflanzenern. Dung. u. Boden. 7 (1928). Pt. 8. 614

INSECTS AND PESTS.

The Relation of Rainfall to the abundance of the larvae of Euxoa segetum on Winter Rye in North Dvina (Trans.title) Z.Azov. Def. Plantes. 5. (1928). No. 5-6. pp.569-71. Abst. in Rev. Appl. Ent. 17A, (1929). Pt. 10. p. 593. 465

Relation of Snow cover to infestation by the Grape Berry Moth (Trans.Title) F.Z. Hartzell. J. Econ. Ent. 22. pp. 126-132. 645

Precipitation as a Factor in the Emergence of the Mexican Bean Beetle from Hibernation. J.R. Douglass. J. Econ. Ent. 21 (1928) No. 1. pp. 203-13. 243

Precipitation and Irrigation as factors in the Distribution of the Mexican Bean Beetle. H.L. Sweetman. Ecology 10. (1929) No. 2. pp. 228-244. Abst. in Rev. Appl. Ent. 17A. (1929) Pt. 7. p. 365. 457

The Effect of Deficiency and Excess in Rainfall upon the Hickory Bark Beetle. M.W. Blackman. J. Econ. Ent. 17 (1924) No. 4. pp.460-70. Abst. in Expt. Sta. Rec. Wash. 52. No.6. p. 559.

Bark-Beetle Epidemics and Rainfall Deficiency. F.C. Craighead. J. Econ. Ent. 18 (1925) No. 4. pp.577-86. Abst. in Rev. Appl. Ent. 13A. (1925) Pt. 10. p. 510. 29

The Relation of Summer Rainfall to Mosquito Prevalence. T.G. Headlee Bull. New Jers. Agric. Expt. Stas. No. 423 (1925) pp. 3-14.

ANIMALS.

Influence of Rainfall on Fecundity of Song Thrush and Blackbird in Perthshire. A.H.R. Wilson. Brit. Birds 19. (1925) No. 1. pp. 22-3.

MISCELLANEOUS.

Influence of Plant Cover (Winter Wheat) on the Temperature of the surface Soil and the Temperature and Moisture of the Air (Trans. title). A. Kameneff. 609
Mem. Inst. Agron. Leningrad. 5 (1929) No. 5. pp. 43-75.
German abstract on pp. 74-5.
Abst. in Expt. Sta. Rec. Wash. 62. No. 4. p. 313.

The Effect of storing Wheat grains at differing humidities on their germination capacity. 332
Sci. Rep. Agric. Res. Inst. Pusa. 1927-28. pp. 36-7.

Moisture Content of Corn (maize) in relation to Relative Humidity and Temperature of the Atmosphere. H. W. Alberts. 121
J. Amer. Soc. Agron. 18 (1926) No. 11. pp. 1029-34.
Abst. in Expt. Sta. Rec. Wash. 56 No. 9. pp. 826-7. (Sep. 1927).

The Relation of Atmospheric Humidity to the Deterioration of Evaporated Apples in Storage. C. W. Culpepper and J. S. Caldwell. 237
J. Agric. Res. 35. (1927) No. 10. pp. 889-905.

The role of atmospheric Humidity in the swelling of Grapes (Trans. title) L. Chaptal.
Ann. Sci. Agron. 1930. No. 2. pp. 236-45.

Influence of Atmospheric and Soil Moisture upon Seed Setting in Red Clover. E. A. Hollowell. 463
J. Agric. Res. 39 (1929) No. 4. pp. 229-47.

Germination

Germination and keeping quality of Parsnip seed under various temperature and Humidity conditions. H.C.Joseph. Bot. Gaz. 87 (1929) No. 1. pp.195-210. Abst. in Expt. Sta. Rec. Wash. 60. No.9- pp.822-3.

The influence of atmospheric Humidity on Seed Potatoes during storage (Trans. title) S.J.Wellensilk. Tydschr. Plantenziekt. 35. No. 1. pp.13-24. Abst. in Biol. Abst. 4(1930).No. 4.p.1210. 621

Relative Humidity over a snow crust and the Transpiration of Conifers. H.I.Baldwin. Bull. Amer. Met. Soc. 9 (1928) No. 4.pp. 81-3. 255

The Response of certain Photoperiodic Plants to differing Temperature and Humidity Conditions.B.E.Gilbert. Ann. Bot. Oxford. 40 No. 158 (May,1926).

The Humidity of the atmosphere in Southern Tunis and its effect on Vegetation (Trans. title) G.Ginestous. Bull.Direct. Agric. Tunis,1928.

PLANT DISEASES.

Temperature and moisture relations of Fomes roseus and Trametes subrosea. W.H.Snell. W.G. Hutchinson and K.H.N. Newton. Mycologia 20. 5. pp. 276-91. Abst. in Rev. Appl. Mycol. 8 (1929).Pt.3. p.147. 415

The role of Humidity in the life cycle, distribution and control of the Loose-smut Fungus of Wheat. V.F.Tapke. Abst. in Phytopathology 19 (1929). No. 1.p.103. 406

High Evaporation: a precursor and concomitant of Western Yellow Tomato Blight. M.Shapovalov. Phytopathology 15. (1925) No. 8.pp.470-8. 18

Relation of Humidity and Ventilation to the Leaf Mould Disease of Tomatoes. A.G.Newhall. Bi-m.Bull. Ohio. Agric. Expt. Sta.13 (1928) No.3.pp.119-22. 325

The Relation of Atmospheric Temperature and Humidity to Tomato Leaf Mould. T.Small. Ann. Appl. Biol.17 (1930) No. 1.pp.71-80. 499

The Relation of

The Relation of Humidity to Infection of of the Sweet Potato by Rhizopus, J.J.Lauritzen and L.L.Harter. 127
J.Agric. Res. 33 (1926) No. 6. pp.527-39.

INSECTS AND PESTS.

Response and adaptation of Insects to external stimili (Temperature and Moisture) W.Robinson. 452
Ann. Ent. Soc. Amer. 21 (1928) No. 3. pp. 407-17.
Abst. in Expt. Sta. Rec. Wash. 60 (1929) No. 9. p.839.

What Factors regulate in nature the Number of Individuals of an Insect Species? (Trans. title). (Temperature and Humidity). F.S.Bodenheimer. 483
Biol.Zbl. 40.No.12. pp.714-39.
Abst. in Rev. Appl. Ent. 17A (1929) Pt. 9. p.489.

Observations on the Causes (Humidity and Air Temperature) of Night Activity in some Insects. H.Necheles. 458
Chinese J.Physiol. 1.No.2.pp.143-56.
Abst. in Rev. Appl. Ent. 17A.(1929) Pt.7. p.411.

Absolute Humidity as a Factor in Insect Cold Hardiness with a Note on the Effect of Nutrition on Cold Hardiness, N.M.Payne. 526
Ann. Ent.Soc.Amer. 22.No. 4.pp.601-20.
Abst. in Rev. Appl. Ent. 18A (1930).Pt.4. pp.166-7.

Metamorphosis and Reproduction in Apterous forms of Myzus persicae. Sulzer as Influenced by Temperature and Humidity. A.Wood. 165
J.Econ.Ent. 20 (1927).No.1.pp.150-7.

The Influence of Temperature and Atmospheric Moisture on the length of the Egg-stage. I.Contribution to an exact biology of Sitona Lineata L. (Trans. title). K.T.Andersen.
Z.Morphol.Oekol.Tiere 17. No. 4. pp. 649-76.

Differential Effects of Constant Humidities on the Tomato Moth and its Tachinid Parasite. H.M.Hofley. 244
J.Econ.Ent. 21 (1928) No. 1.pp.213-21.

The Influence

The Influence of Temperature and Humidity upon the development of the Houghton Gooseberry Aphis. D.M.De Long and A.A.Mathewson. J.Econ.Ent. 18(1925) No.1.pp.172-6.

The Relation of Temperature, Light and Humidity to the Behaviour and Longevity of a Joint Worm Parasite. C.H.Brannon. J.Elisha Mitchell. Sci.Soc. 42.No.142. pp.99-108.
Abst. in Rev. Appl. Ent.15A (1927) Pt.7. p.391.

The Effect of Variation in Relative Humidity on Certain Species of Collembola.W.M.Davies. 467
Brit.J.Exp.Biol.6 (1928) No.1.pp.79-86.

Observations on the Thermal Death Point of the Blow Fly at different Relative Humidities.M.V.F.Beattie. 256
Bull. Ent. Res. 18 (1928) Pt.4. pp.397-403.

Relation between Temperature, Humidity and Activity of House Mosquitoes, W.Rudolfs. 56
J.N.Y. Ent. Soc. 33 (1925) No. 3. pp. 163-9.
Abst.in Rev. Appl. Ent. 13b. (1925).Pt.12. p.185.

The Influence of Humidity on the Habits of Anopheles Masulipennis. H.Nocheles. 204
Far East Assoc. Trop. Med. Trans. 6th Bien. Cong. Tokyo. 1925. 2.p.53.
Abst. in Rev. Appl. Ent. 15b. (1927) Pt.8. p.139.

A study of the influence of Relative Humidity on the Life and Infectibility of the Mosquito. 622
B.Mayne. Ind.J.Med.Res. 17. No. 4. pp.1119-37.
Abst. in Rev. Appl. Ent. 18b. (1930) Pt.9.p.194.

Influence of Temperature and Humidity on the Oviposition and Early Life of Anopholines.
B.Mayne.
Publ. Hlth. Repts Wash. 61. No. 21. pp.986-90

ANIMALS.

Preliminary Report on Observations on the Development of Ova of Pig and Human Ascaris under natural conditions and studies of factors (Temperature and Humidity) influencing development 501
F.C.Caldwell and E.L.Caldwell.
J.Parasit. 14. 4. pp. 254-60.

Effect

Effect of Temperature and Humidity on the susceptibility and resistance to Tuberculosis in Guinea-pigs. A.M. Baetjer and L.B. Lange. Amer. J. Hyg. 8. (1928) p.935. 321

MISCELLANEOUS.

Wound Periderm Formation in the Potato as affected by Temperature and humidity. E. Artschwager. J. Agric. Res. 35 (1927) No.11. pp.995-1000.

The effect of Evaporation and Light on the Distribution of Lichens on a Tree. Bull. Torrey. Bot. Cl. 51. (1924) pp.203-10. Abst. in Bot. Abst. 14 (1925) No. 2. p.185.

Relative Humidity and the incidence of Forest Fires. D.V. Noble. Bull. Amer. Met. Soc. 7 (1926) No.5. pp.74-7. Abst. in Expt. Sta. Rec. Wash. 55. No. 8. p.717. 170

Solar Radiation and Relative Humidity in relation to duff moisture and Forest Fire Hazard. P.R. Gast and P.W. Stickel. Mon. Weath. Rev. Wash. 57 (1929) No. 11. pp. 466-8.

Relative Humidity and Forest Fires D.R. Bergsmark. Trans. Ill. State Acad. Sci. 20 (1928) pp. 238-46. 653

The Control of Atmospheric Humidity in a closed system. B.D. Bolas. New Phytol. 30. (1926) No. 2. pp.119-26.

Constant temperature and humidity chambers I. Johnson. Phytopathology 18 (1928) No. 2. pp.227-38. 106

W I N D.

PLANTS.

Effect of Wind on Plant Growth. H.H. Finnell. J. Amer. Soc. Agron. 20 (1928), No. 11. pp.1206-10. 326

Wind and Plants (Trans title) O. Bornbeck. Flora Treviso (1924) pp. 293-300. Abst. in Bot. Abst. 14 (1925), No. 8. p.1060. 117

Wind

Wind Damage as related to quantity and quality of Orange production. W. Smith. Calif. Citrogr. 10 April, 1925. pp. 196; 206-7.

Windbreaks as protection to Citrus groves in Southern California. Bull. Amer. Met. Soc. 7(1926) pp. 142-3.

Wind and Exposure as limiting factors in the establishment of Forest Plantations, H. S. Belyea. Ecology, 6. (1925) pp. 238-240. Abst. in Bot. Abst. 15 (1926), No. 2, p. 229. 71

INSECTS AND PESTS.

Wind and the direction of Insect Flight. F. E. Lutz. Amer. Mus. Nov. 291. pp. 1-40. Abst. in Biol. Abst. 4(1930), No. 3. p. 955. 623

On the Influence of the Wind in the Spread of Anopheles maculipennis. N. H. Swellengrebel, Amer. J. Hyg. 10. No. 2. pp. 419-34. Abst. in Rev. Appl. Ent. 18b. (1930) Pt. 2. pp. 23-4. 508

MISCELLANEOUS.

Studies on the Action of Winds in cold and temperate regions (Trans. title). C. Samuelsson. Bull. Geol. Instn. Univ. Upsala 20. 1926, pp. 58. 230.

Windbreaks. H. H. Finnell. Bull. Panhandle Agric. Expt. Sta. 7 (1929). pp. 13-4. Abst. Expt. Sta. Rec. Wash. 61 No. 6. p. 532. 564

The Use of Windmills for the Generation of Electricity. Bull. Inst. Agric. Oxford. No. 1, 1926. 83

Wind as motive power for Electrical Generators. H. G. Carter. Mon. Weath. Rev. Wash. 54 (1926) No. 9, pp. 374-6. 135

The wind-driven electric light plant. F. C. Fenton. Olf. Pub. Iowa. Coll. Agric. 24, (1926). No. 32. p. 6-9.

LIGHT

AND OTHER

RADIATIONS OF SHORT WAVE-LENGTH.

PLANTS.

Influence of Sun Rays on Plants and Animals. C.G. Abbot, Rep.Smithson. Instn. 1926. pp.161-73.

The Influence on Arctic Plant Life of the power of the Sun's Rays to penetrate snow (Trans.title) K.Richter. Naturwissenschaften 1926. 14. p. 501.

Solar Radiation and Plant Growth. V.H.Blackman. Rep.Agric.Met.Conf.Lond. 1926. pp.23-4.

Sunlight, The Plant and Crop Efficiency. V.H.Blackman. Yearb.Essex Co. Fmr's Un. 1927 pp. 283-9.

On Solar Activity and certain phenomena of Vegetation. T.Moreux C.R.Acad.Sci. Paris 184. 1927 pp. 1090-1.

The influence of Temperature and Light on the Date of Flowering. (Trans.title) A.I.Molozev. 599
Bull.Appl.Bot.Gen.Pl.Breed. 22. 1929 pp. 277-372. English Summary.

On the control of Flowering time of paddy Rice Plants by the action of Light (Trans.title). Y.Noguti. 626
J.Sci.Agric.Soc.299, pp.487-500. English Summary.
Abst.in Biol.Abst. 4 (1930). No. 2. p. 356.

Light and Growth I. The Effect of brief Light Exposure upon etiolated Plants. J.H. Priestley. 128
New Phytol. 24. (1925) No. 5. pp.271-83.

Light and Growth II. On the Anatomy of Etiolated Plants. 129
J.H. Priestley.
New Phytol. 25. (1926) No. 3. pp.145-70.

Light and Growth III. An Interpretation of Phototropic Growth Curvatures. J.H. Priestley. 130
New Phytol. 25. (1926) No. 4. pp. 213-26.

Light and Growth IV. An Examination of the Phototropic Mechanism concerned in the Curvature of Coleoptiles of the Gramineae. J.H Priestley. 131
New Phytol. 25. (1926) No. 4. pp.227-47.

Light and Growth. Note in Nature Lond. 119. 181
9th Apr. 1927. p. 543.

Light - Growth reactions in Avena (Trans.title).
C. Van Dillewijn.
Rec.Trav.Bot.Neerland. 24 (1927) No.1-3 pp.307-581.

Some further experiments on the Relation of Light to Growth. J. Adams. 173
Amer.J.Bot. 12 (1925) No. 7 pp.398-412.
Abst. in Expt.Sta.Rec. Wash. 55 No. 8. pp. 726-7.

A Physiological Study of the Effect of Light of various ranges of wave-lengths on the growth of Plants. H.W.Popp. 245
Amer.J.Bot. 13 (1926) No.10 pp.706-36.
Abst. in Expt. Sta.Rec. Wash. 58 No.2 p.124.

The Influence of Light relations on the development of root systems (Trans.title). N.A.Maximow and E.Lebedincev. 566
Ber.deuts.bot.Ges. 41 (1923). No.7. pp.292-7.
Abst. in Expt.Sta.Rec. Wash. 61. No.5. p.424.

Experiments on the Effect of Light on the root nutrition of Plants (Trans.title). M.K.Domontovitsch and A.J. Groschenkow. 544
J.Landw.Wiss 1. 1929. 6 p 179; 2 6 p 767.

G. Klein.
Fetschr Osterreigh. Gartenbeugesellsch 1827-1927
pp. 33-53. Vienna. 1927.
Abst. in Expt.Sta.Rec. Wash, 58 No. 6. p.525

Effect of Light, Carbon Dioxide and Temperature on flower and fruit production. J.M. Arthur and J.D. Guthrie. 472
Mem.Hort.Soc.N.Y. 3 (1927) pp. 73-4
Abst. in Expt.Stat. Rec. Wash. 60. No. 9. pp. 806-7

Effect of Sunlight on sap concentration of Citrus. leaves. F.F. Halma and A.R.C. Haas. 625
Bot. Gaz. 86. No. 1. pp. 102-6.

The Influence of Bright Sunshine upon the Tomato under Glass. W.F. Bewley. 442
Ann. Appl. Biol. 16 (1929) No. 2. pp.281-7

Effect of Sunshine and shape of fruit on the Rate of Ripening of Tomato Fruits. C.L. Baker and H.D.Brown. 567
Pl. Physiol. 3. No. 4. pp. 513-7.
Abst. in Expt. Sta. Rec. Wash. 60. No. 5. p. 439

The practical significance of increasing the daily Light period of winter for strawberry breeding. 568
G.M. Darrow and G.F. Waldo.
Science 69 (1929). No. 1793. pp. 496-7
Abst. in Expt. Sta. Rec. Wash. 61. No. 6. p. 528

Effect of the Light Intensity on growth of Soy Beans and its relation to the autocatalyst theory of growth. 569
H.W. Popp.
Bot. Gaz. 82. (1926) No. 3. pp. 306-19.
Abst. in Expt. Sta. Rec. Wash. 61. No. 4. p. 324.

The Inhibitive Effect of Direct Sunlight on the Growth of the Date Palm. S.C. Mason. 54
J. Agric. Res. 31 (1925) No. 5. pp. 455-68.

Influence

Influence of Length of Day on Cabbage Lettuce. 406
(Trans.Title). A.H.Bremer.
Meld.Norg.Landbr.Høink. 9 (1929) No.1-2.pp.1-39.

Sex ratios in Cucumber Flowers as affected by different 289
conditions of Soil and Light. V.A.Tiedjens.
J.Agric.Res. 36 (1928) No.8. pp.721-46.

Light intensities required for Growth of Coniferous 627
Seedlings. C.G.Bates and J.Roeser.Jr.
Amer.J.Bot. 15 No.3. pp.185-94.

The relative Light Requirements of some Coniferous 98
Seedlings. C.G.Bates.
J.For. 23 (1925). No.11. pp.869-79.
Abst.In Expt.Sta.Rec. Wash. 54. No.2. p.142.

Climatic cycles and Tree Growth. 2. A Study of the
Annual rings of trees in relation to climate and solar
activity. A.E.Douglass.
Pub.Carnegie Instn. No.289. pp.1-166.
Abst. in Biol.Abst. 3 (1929) No.7-8. pp.1439-40.

Light and Soil Moisture in Forestry. G.A.Pearson.
Ecology 11 (1930). No.1. pp.145-60.
Abst.in Expt.Sta.Rec.Wash. 62 No. 6. p. 530.

Some aspects of Light in the Forest. A.Brasovsky. 570
Yale For. Sch.Bull. No.23. (1929).
Abst. in Expt.Sta.Rec. Wash. 61. No.1. p.42.

Solar Radiation and Relative Humidity in relation to
duff moisture and Forest Fire Hazard. P.R.Gast and
F.W.Stickel.
Mon.Weath.Rev. Wash. 57 (1929) No.11. pp.466-8.

Ultra-violet Light and Plant Production. J.Reinhold 592
and F.Schulz.
Gartenbauwiss. 2 (1929) No.1. pp.40-78.
Abst. in Expt.Sta.Rec. Wash. 61. No.9. p.834.

The Influence of Ultra-violet Light on Plants. A
Review of the literature. E.M.Delf.
Biol.Rev. 3. No.3. pp.261-9.

The Effect of Ultra-violet Radiation upon Higher 633
Plants. E.T.Eltinge.
Ann.Missouri Bot.Gdn. 15 No.2. pp.169-240.
Abst.in Biol.Abst. 4 (1930) No.2. p.354.

Action of Ultra-violet Rays on etiolated Plants 634
(Trans.title). S.Colla.
Bull.Soc.ital.Biol.sperim. 2. No.7. pp.724-6.
Abst. in Biol.Abst. 4 (1930). No.2. p.354.

Effect of Ultra-violet Light upon Digitalis Purpurea.
A. McCrea.
Science. 67. 1928. pp.277-8.

The Effect of X-rays on Seeds. A.L.F.Patten and 427
S.B.Wigoder.
Nature Lond. 123. 20th Apr. 1929, p.606.

The Effect of X-rays on Potato tubers for "seed." 572
H.B.Sprague and M.Lenz.
Science 69.(1929). No.1797. p.606.
Abst. in Expt.Sta.Rec. Wash. 61. No.7. p.628.

Effect of X-Rays on Normal and Diseased Vegetable
Tissues (Trans.title) V.Rivera.
Ann.Inst.Pasteur 40 (1926) No.7. pp.644-58.

PLANT

PLANT DISEASES.

Experiments in selective irradiation on Plant tumours (Trans.title). M.Ponzio. 295
Giorn.Acc.Med.Torino. 5 (1928). 6. pp.342-4.
Abst.in Rev.Appl.Mycol. 7 (1928) Pt.8. p.497.

Effect of Polarised Light on Bacterial Growth. 74
S.S.Bhatnagar.and R.B.Lal.
Nature Lond. 117. 27th Feb.1926. p.302.

Application of Ultra-violet Light in Phytopathology. (Trans.title) L.Petri.
Boll.R.Staz. Pat.Veg. 6.4 pp.345-8.

The Fungicidal Action of Ultra-Violet Radiation. 428
H.R.Fulton and W.W.Coblenz.
J.Agric.Res. 38. No.3. pp.159-68.

Effects of X-ray on Normal and Diseased Vegetable Tissues (Trans.title) V.Rivera.
Ann.Inst.Pasteur. 40 (1926) No.7. pp.644-58.

On the Effects of X-rays on Fungi, H.K.Svenson. 429
Science 69. 29th Mar. 1929. p.361.

Effect of Ultra-violet radiation upon sporulation in Macrosporium and Fusarium. G.B.Ramsey and A.A.Bailey. 545
Bot. Gaz. 89. 2. pp.113-36.
Abst. in Phytopathology 20 (1930). No.1. p.141.

Influence of Ultra-violet Radiations on the Bacillus Typhi Murium (Virus Danysz)(Trans.title). F.Rhode.
Ann.Epiphyties 14 (1928). No.3. pp.311-26.

Wheat Smut and X-rays (trans.title). V.Rivera.
Boll.R.Staz.Pat.Veg. 6.3. pp.237-41.

Effect of Irradiation on Crown Gall. (Trans.title) V.Rivera.
Riv.Biol. 9. (1927) 1. pp.62-9.

Effect of X-rays on Crown Gall (Trans.title).V.Rivera. 110
Riv.Biol. 8 (1925). 1. p.1-15.
Abst. in Rev.Appl.Mycol. 5.(1926). Pt.9. p.539.

The development of Tomato Yellows under different Light conditions. M.Shapovalov. and F.S.Beecher. 436
Abst.in Phytopathology 18 (1929). No.11. p. 950.

The Killing of Plant Tissue and the inactivation of of Tobacco Mosaic Virus by Ultra-violet Radiation. 486
J.R.Arthur and J.M.Newell.
Amer.J.Bot. 16. No.5. pp.338-53.
Abst. in Rev.Appl.Mycol..8 (1929).Pt.11.pp.678-9.

INSECTS AND PESTS.

Light and Insect development (Trans.title)
K.Friedrichs and P.Steiner.
Zbl.Bakt. 2 80. pp.71-7.
Abst. in Z.Angew Ent. 16. 2. p.415.

The effect of Intensity and Duration of Light and of Duration of Darkness, partly modified by Temperature, upon Wing-Production in Aphids (Trans. title). A.F.Shull.
Arch. Entw.Mech.Org. 115. No.4-5. pp.825-51.
Abst. in Rev.Appl.Ent. 17A (1929) Pt.9.p.490.

Control

Control of gamic and parthenogenetic reproduction in winged Aphids by Temperature and Light (Trans. title). A.F.Shull.
Z.indukt.Abstamm.u.Vererb. Lehre. 55.No.1-2.pp.108-26

Responses to Light of the Bud Moth and Leaf Roller. 635
D.L.Collins and M.W.Nixon.
Bull.N.Y.Agric.Expt.Sta. No.583.
Abst.in Rev.Appl. Ent. 18A (1930). Pt.9.p.469.

A Field test of the Effect of Artificial Light on the 573
behaviour of the Codling Moth, Carpocapsa pomonella Linn. W.B.Herms.
J.Econ.Ent. 22 (1929). No.1.pp.78-87.
